

Avenza Systems Inc. Workshop in MAPublisher
Monday, September 14, 2009
10:00 a.m. – 5:30 p.m.

Participants will use the latest version of MAPublisher with Adobe Illustrator CS4 to discover the latest in cartographic design technology from Avenza Systems. Students will learn to import GIS data into the vector graphics design environment from a variety of popular GIS applications including Arcview Shapefiles and MapInfo mid/mif files as well as aerial and satellite raster imagery, and will become familiar with the dozens of cartographic and map-making tools contained in MAPublisher for creating world-class cartographic products. Experience and work with the newest MAPublisher labeling, attributes and grid/graticule generation functions as well as the popular MAP Views and Stylesheets functions and drag-and-drop projection transformation engine.

Each student will also receive a fully functional evaluation copy of MAPublisher to continue his or her exploration of this modern map production software suite after the IMTA (Americas) Conference is over.

The workshop fee is USD\$100. The course is normally priced at USD\$1000 per student so a savings of USD\$900 per student is offered. Class size is limited to ten students.

Form must be completed for each individual taking one or both of the above courses.
