www.pythagoras.net

ADW Software is a software company and has been developing Pythagoras CAD+GIS since 1991. Pythagoras GIS+CAD has been designed for local authorities, cadastral services, utility companies, urban planning, and for scientific research. Its application is to analyze and visualize spatial information, without being limited to geographical objects only.

Only one software application should be used to complete the whole process: creating and updating geographical information, consulting and updating of spatial information, analyzing of spatial information and reporting and mapping of the analysis.

Pythagoras GIS+CAD is the ideal tool to create customer specific geographic products that integrate data and software. The DVD's (actually 9) containing the 1:50000 and 1:10000 Topographic Maps of Belgium for recreational use are published in collaboration with NGI (National Geographic Institute).

The integration of the data on the DVDs is made completely with Pythagoras GIS+CAD. Besides the software (Pythagoras Topo) is based on Pythagoras.

Dan Dillon  
ddillon@replugleglobes.com  
www.replugleglobes.com

A leading globe manufacturer for 80 years, Replogle Globes offers high quality globes for the home, school, and office. Our collection includes desktop, floor, inflatable, educational, specialty, and designer globes.

Replogle Globes will be introducing two new exciting products this year. The Intelliglobe™, and World Wise Geographic Card Games. The Intelliglobe™ uses an infrared scanner to “read” microscopic symbols on the globe. Touch the wireless Intelli-pen to the globe to play games, explore, and discover amazing educational facts about the world. The Intelliglobe™ features thousands of facts in 4 different languages: English, Spanish, French, and German.

Information for the Intelliglobe™ can be updated through the Replogle Globes website. Learn about the world and have fun doing it. World Wise card games are easy to play. Each player must play a card that borders the geographic location of the card that was last played. The person who runs out of cards first or has the least amount of cards at the end of the game wins!

Williams & Heintz Map Corporation is a full-service map printer supplying superior cartographic products and services located in Capitol Heights, Maryland. We are a nationally known, woman owned, fourth generation family business with over 89 years of experience printing a wide variety of maps for a diversified customer base. Our talented map artisans produce quality maps with an assortment of graphics and GIS software.

Our skilled pressmen can print maps of any size up to 47" x 64" on a wide selection of stocks, including high wet strength and plastic on presses that print up to 6 colors in one pass while maintaining close registration.

Our in-house bindery team folds maps in any number of configurations, including user-friendly styles that can be leafed through like the pages of a book. We embrace ecologically sustainable practices and care about the people in our community. If you would like to hear about the sustainable materials and methods used to produce your map, call us for a free consultation. Tel: 800-338-6228.
